Ex NO: **STORY BOARD FOR A SAMPLE PROJECT**

Date:

Aim

To create a storyboard in Tableau for a sample project .

Procedure

1. **Set Up Your Environment**

    o Open Tableau Desktop and connect to a sample dataset (e.g., **Sample Superstore** provided with Tableau).

2. **Prepare Your Visualizations**

    o Create visualizations based on your project's objective. For example, if the project is about sales performance:

    o ▯ **Bar Chart:** Show sales by region.

    o ▯ **Line Chart:** Display trends in profit over time.

3. **Create a New Story**

    o Click the **New Story** tab at the bottom of Tableau.

    o Choose the Story Size based on the device or display requirements (e.g., Standard or Wide).

4. **Add a Title to Your Story**

    o In the story workspace, add an appropriate title (e.g., **"Sales Performance Analysis"**).

5. **Add Story Points**

    o Drag your prepared visualizations or dashboards to the story area:

- **Story Point :** Introduce the objective, such as analyzing sales trends by region.

6. **Enhance Each Story Point**

   ○ Add captions, annotations, or brief text descriptions for clarity.

7. **Navigate Through the Story**

   ○ Test navigation using the arrows or tabs to ensure the story flows logically.

Result

Thus a storyboard is created in Tableau for a sample project.
